

## Triple-A

**Project ID:** 846569

**Funded under:**

H2020-EU.3.3.1. - Reducing energy consumption and carbon footprint by smart and sustainable use

H2020-EU.3.3.7. - Market uptake of energy innovation - building on Intelligent Energy Europe

### Enhancing at an Early Stage the Investment Value Chain of Energy Efficiency Projects

From 2019-09-01 to 2022-02-28, Grant Agreement signed

#### Project details

<b>Total cost:</b> EUR 1 486 196,25	<b>Topic(s):</b> <a href="#">LC-SC3-EE-10-2018-2019-2020 - Mainstreaming energy efficiency finance</a>
<b>EU contribution:</b> EUR 1 486 196,25	<b>Call for proposal:</b> H2020-LC-SC3-EE-2018 <a href="#">See other projects for this call</a>
<b>Coordinated in:</b> Greece	<b>Funding scheme:</b> CSA - Coordination and support action

#### Objective

Triple-A has a very practical result-oriented approach, seeking to answer three questions:

- How to assess the financing instruments and risks an early stage?
- How to agree on the Triple-A investments, based on selected key performance indicators?
- How to assign the identified investment ideas with possible financing schemes?

The Triple-A scheme is introduced, comprising three critical steps (answering each question), with the following main outputs:

- Step 1 - Assess: Member States (MS) risk profiles and mitigation policies, including a Web based database, enabling national and sectoral comparability, market maturity identification, good practices experiences exchange, reducing thus uncertainty for investors.
- Step 2 - Agree: Standardised Triple-A tools, efficient benchmarks, and guidelines, translated in consortium partners' languages, accelerating and scaling up investments.
- Step 3 - Assign: In-country demonstrations, replicability and overall exploitation, including recommendations on realistic and feasible investments in the national and sectoral context, as well as on short and medium term financing.

The Triple-A case study countries were selected to promote diversity across a number of factors, including: a leading European economy (Germany), an innovation front-runner in energy (The Netherlands), a weak economy, went through one of the longest and most severe recessions (Greece), an economy with slow economic recovery (Italy), a diversified economy with a strategic geographical location having some of the largest European firms (Spain), a country that has experienced one of the fastest economic recoveries in Europe (Lithuania), a progressing country with a once sceptical stance towards low-carbon development (Czech Republic), and a country, recovering from a slow transition to a market economy, with growing regional strategic role and significant ambition towards EU processes (Republic of Bulgaria).
