

Triple-A Questionnaire on Building Sector : Highlights

We are glad to share with you the preliminary results of our forthcoming **Report on Energy Efficiency in Building Stock & Correlation with Property Value**.

Our research aims to analyse **the current building stock situation in Greece** and **the behaviour of stakeholders**, general public and professionals **towards energy efficiency upgrades in buildings**.

The research focuses on identifying the **main risks** that could affect the successful implementation of energy efficiency projects in the **building sector** and how the **Standardised Triple-A Tools** could contribute to the real estate sector.

The main results and highlights are derived from the analysis of the **Triple-A Questionnaire on Building Sector**. This work concerns the Triple-A Greek case study and responses received up until July 2020 from 77 stakeholders of the **Association of Greek Valuers (A.V.A.G.)**.

Find the **presentation of the preliminary results and main conclusions** of the Triple-A Questionnaire on Building Sector [here](#).

The full report will be published soon, so stay tuned [at our website](#) !
