## **Triple-A Capacity Building Webinars on "Financing Energy Efficiency"**

May - June 2021

As part of **Triple-A stakeholder consultation** a series of **Capacity Building Webinars** are organized in the 8 case study countries within EU (i.e. Bulgaria, Czech Republic, Germany, Greece, Italy, Lithuania, The Netherlands, and Spain) **from May to June 2021.**

The purpose of these webinars is to share knowledge relevant for **financing energy efficiency projects in the EU**, so as to support investments in this area, and to raise interest for the Regional Training Workshops on the Triple-A Tools and methodology.

### **1<sup>st</sup> SMAFIN National Roundtable in Greece**

20<sup>th</sup> of May 2021

The 1<sup>st</sup> SMAFIN National Roundtable in Greece **"Support Smart Financing for Energy Efficient Buildings in Greece"** was organised on the 20<sup>th</sup> of May 2021. Dr. Chara Karakosta (NTUA), represented Triple-A and participated as panelist in the session **"Competitive processes to improve the energy efficiency of companies in the tertiary sector"**, further promoting **how Triple-A could foster investments in the tertiary sector.** Some of the topics discussed were how the financing of the companies involved in projects in tertiary sector will be secured by the banking sector and how smart online tools could be used to bring together small projects and connect project developers with interested investors.

### **3<sup>rd</sup> Meeting of the EEFIG Industry Working Group**

5<sup>th</sup> of February 2021

Triple-A was presented at the **3<sup>rd</sup> meeting of the EEFIG Industry Working Group** on the 5<sup>th</sup> February 2021. The topic of the event was "**Accelerating industrial energy efficiency investments in the context of the EU recovery package**". It was an important topic, since there is an urgent need to look at how investments in energy efficiency could play an important role for our economic recovery from the COVID-19 pandemic. However, this acceleration is also meant to assist in meeting increasingly ambitious climate and energy objectives.

### *E2DRIVER Learning Platform*

The [E2DRIVER platform](#) offers training courses and numerous other features to new learners from the automotive industry interested in implementing **energy audits and energy efficiency measures**. Its main strength lies in the adaptability of the main training course to the skillset and motivations of employees and managers from automotive companies. By completing a simple classification survey, learners are able to access tailor-made training content based on their background information.
